EDUCATION

Thapar Institute of Engineering and Technology

Bachelor of Computer Engineering with current CGPA of 9.04

Patiala, Punjab, India

2023–2027

Innocent Hearts Group Of Institutions

Class 12 score of 91%

Class 10 score of 92.6%

Jalandhar, Punjab, India

2008–2023

PROJECTS

LegalAide| LangChain, Solana Blockchain, Web3.py, NLP, LLMs | GitHub-Link

- Built an AI-driven legal compliance platform with **automated smart contract workflows** and a **RAG pipeline (LangChain)** retrieving insights from **2,000+ legal texts**.
- Improved legal research efficiency by ~50% through **NLP-based summarization of complex documents, IPC section extraction**, and intelligent case law recommendations.
- Integrated a **Solana blockchain layer** to **verify, timestamp, and securely store legal documents**, ensuring their **Authenticity and immutability** across jurisdictions.

SEBI's Arthrakshak| Streamlit, Python, Financial data API, Typescript, Machine Learning | GitHub-Link

- Developed a smart compliance monitoring platform that acts as a *virtual compliance officer* for small and medium brokers.
- Implemented ML-based models to detect suspicious trading patterns (e.g., circular trading, pump-and-dump, spoofing) and issue real-time alerts.
- Built an **NLP-powered SEBI Rule Tracker** that automatically extracts key action points from circulars and exchange notices.
- Designed a **real-time compliance dashboard** for monitoring margins, exposure, and client verification with prioritized risk alerts.
- Enhanced transparency and trust by combining **AI-driven analysis with rule-based explainability**, reducing false positives and manual review time.

ELC Projects |Thapar Institute of Engineering and Technology

- IoT** based Smart Remote Monitoring System under **Cyber Security Activity**
- Design and Development of Tools exploration on **Mobile App Development**
- Developed Real-time face recognition, autonomous vehicle, augmented reality using **Computer Vision**

EXPERIENCE

Research Internship |IIT Ropar |June 2025 – July 2025

- Built high-performance React apps** with smart **memorization** to boost UI speed and avoid unnecessary re-renders.
- Implemented scalable architecture** using **IoC** containers and dependency injection in **TypeScript** for cleaner, testable code.
- Designed optimized MongoDB schemas and indexes**, improving data access and system efficiency in real-world use cases.

Marketing & Business Analyst Intern |Seven Media|May2025

- Executed **targeted digital marketing campaigns** across social media platforms, increasing engagement.

SKILLS

Languages: TypeScript, C++, Python, R, MATLAB

Software: AutoCAD, Figma, Canva, Solidworks, VSCode, Git

Framework: React, Node.js

Database: MySQL, Oracle SQL, MongoDB

POSITIONS OF RESPONSIBILITY

Google Developer Group, Thapar

Mentor

- Worked on over **10+ projects** including chatbot, sports equipment management project
- Organised **bootcamps** for over **2000+** students

ACHIEVEMENTS

- Selected in **Bhasha Bandhu** (Hackathon by **Microsoft**) selected from a pool **1000+** Teams
- Ranked **Top 30** Nationwide at the **SEBI Global FinTech Fest** Hackathon, pitching to executives and **directors of SEBI, BSE, and NSDL** among **1,000+** teams.
