Summary

Built and shipped **4 production systems** across mobile, desktop, and backend, including a published Android/iOS app and a multi-tenant SaaS platform. Pursuing full-stack SDE roles requiring end-to-end ownership, from API design and database architecture to deployed product.

Education

Thapar Institute of Engineering and Technology

Aug 2023 – Aug 2027

B.E. in Computer Science and Engineering, CGPA: 9.20/10.0

Patiala, Punjab

- **Relevant Coursework:** Data Structures & Algorithms, OOP, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

IIT Madras (Online)

Aug 2023 – Aug 2027

B.Sc. in Data Science, CGPA: 7.88/10.0

Chennai

Technical Skills

Languages: Python, Kotlin, Swift, C/C++, SQL, JavaScript
Backend & APIs: FastAPI, REST API Design, Celery, Redis, SQLAlchemy, Pydantic
Mobile & Desktop: Kotlin Multiplatform, Jetpack Compose, SwiftUI, Android Studio
Databases: PostgreSQL, Firebase Firestore, Room Database, MongoDB
Cloud & DevOps: Firebase, AWS Lambda, AWS S3, Docker, GitHub Actions
ML / AI: Whisper, Pyannote, LLM APIs, ChromaDB, Scikit-learn, Pandas
Architecture: MVVM, Multi-tenancy, Async/Coroutines, OOP
DSA: Actively solving on LeetCode · leetcode.com/u/sharnya_goel

Work Experience

Worker Helper App | [Play Store](#)

Mar 2026 – Apr 2026

Freelance | Published on Google Play Store | Kotlin Multiplatform, Firebase Firestore

Remote

- Shipped a cross-platform mobile application (Android + iOS) with live complaint tracking, role-based authentication, and mandatory proof uploads before task completion.
- Shared business logic across **2 platforms** via a common KMP module, separating auth, task, and media responsibilities.

Dreamland – Multi-Hotel SaaS Reception System

Mar 2026 – Jun 2026

Freelance | Kotlin, Compose Desktop, Firebase Firestore, MVVM, Coroutines

Remote

- Architected a multi-tenant hotel ERP across **25 database collections** with per-hotel isolation via tenant-scoped queries across 17 repositories.
- Eliminated redundant data fetches across **15 screens** via **63 reactive state stores** across 18 MVVM ViewModels.

Projects

AI Meeting Assistant | [GitHub](#)

Apr 2026 – Present

Python, FastAPI, Whisper, Pyannote, Celery, Redis, Docker, PostgreSQL

Remote

- Developed a fully asynchronous FastAPI backend (**35 async functions**, 99 await call sites) isolating CPU-bound ML inference from the event loop via `run_in_executor`.
- Orchestrated a Celery task pipeline with **2-retry / 30s backoff** and graceful LLM fallback (OpenRouter → local BART); eliminated meeting length limits via map-reduce chunking above **50,000 characters**, achieving **63% test coverage** across 32 tests (WER, ROUGE, action-item recall).

Jewellery Shop Management Software

Aug 2025 – Oct 2025

Freelance | Client: Retail Jewellery Business | Kotlin Multiplatform, Compose Desktop, Firebase

Remote

- Engineered GST-compliant invoice generation (OpenPDF) with a **13-column** A4 line-item table across 7 PDF sections; auto-uploaded to cloud storage.
- Wired **3 database snapshot listeners** into Kotlin StateFlow, propagating live gold (6 karats) and silver (4 purities) rates across **10+ screens** with zero polling.

Achievements

JPMC Code for Good Hackathon – Finalist

Jul 2025

Code for Good, Bangalore

- One of **44 students** selected from Thapar Institute after a technical test, interview, and final shortlisting round.

Bit N Build 2025 Hackathon – National Finalist

Oct 2025

Fr. Conceicao Rodrigues College of Engineering, Mumbai

- Won the Punjab regional round; represented Thapar Institute at the national finals in Mumbai.
