## Professional Summary

Motivated Computer Engineering undergraduate (CGPA: 8.34/10) at Thapar Institute of Engineering & Technology with hands-on experience in machine learning, data analytics, statistical modeling, and large-scale data processing. Proficient in Python, SQL, and the complete ML lifecycle including data collection, cleaning, feature engineering, model development, evaluation, visualization, and documentation. Strong ability to communicate technical findings to stakeholders and collaborate across teams.

## Technical Skills

**Languages:** Python, SQL, R, C++, C

**Machine Learning:** Scikit-Learn, Random Forest, Logistic Regression, Naive Bayes, TF-IDF, Classification, Regression, Model Evaluation

**Data Processing:** Pandas, NumPy, Data Cleaning, Feature Engineering, Data Mining, Statistical Analysis

**Visualization:** Matplotlib, Seaborn, Dashboard Development, Data Storytelling, Insight Presentation

**Tools & Development:** Git, GitHub, Flask, React, Node.js, MongoDB, HTML, CSS, JavaScript

**Practices:** Experiment Documentation, Model Reproducibility, Cross-Functional Collaboration, Agile Delivery

## Experience

### Summer Intern — Cybersecurity & Data Analysis

*Jun 2026 – Jul 2026*

*HCL Technologies, Noida*

- Collected and processed enterprise security log datasets from multiple sources, applying data cleaning and statistical analysis to identify anomalous patterns and generate actionable insights.
- Built Python automation scripts to streamline data collection pipelines and reporting workflows, improving efficiency and reproducibility.
- Communicated analytical findings to cross-functional stakeholders, translating technical results into clear business recommendations.

## Projects

### UPI Fraud Detection System

- Developed an end-to-end fraud detection pipeline using Random Forest and Logistic Regression, incorporating data preprocessing, feature engineering, model evaluation, and visualization dashboards.

### Scam Message Classifier

- Built an NLP-based classification system using TF-IDF and Naive Bayes to identify scam messages, deployed through Flask with confidence-scored predictions.

### TOPSIS Decision Support System

- Implemented a multi-criteria decision-making platform using the TOPSIS algorithm with automated reporting and real-time visualization.

### TOMATO Food Delivery Platform

- Developed a full-stack application featuring structured data modeling, user segmentation logic, and real-time analytics tracking.

## Education

|                                                                                      |           |               |
|--------------------------------------------------------------------------------------|-----------|---------------|
| <b>Thapar Institute of Engineering &amp; Technology</b><br>B.E. Computer Engineering | 2023–2027 | CGPA: 8.34/10 |
| <b>Krishna Vatika Sr. Sec. School, Bathinda</b><br>CBSE Class XII                    | 2023      | 88%           |
| <b>St. Xavier's Sr. Sec. School, Bathinda</b><br>CBSE Class X                        | 2021      | 95.6%         |

## Certifications & Leadership

- Microsoft AICTE Virtual Internship — Foundations in Artificial Intelligence (Edunet Foundation)
- IBM AICTE Virtual Internship — Generative Artificial Intelligence (Edunet Foundation)
- Cisco AICTE Virtual Internship — Cybersecurity (Cisco Networking Academy)
- Project Head — Good Touch/Bad Touch Initiative (100+ students impacted)
- Organizing Lead — Blood Donation Camp (500+ units collected)
- Executive Member — Rotaract Club & Thapar Adventure Club (2023–24)
